A CHALLENGE TO LIONEL 4-4-2 STRONGFORT III

What strength can really do—will I beat your 4-4-2 STRONGFORT III for a new one? If so, let me know at once. Apparently in America now and will talk a bit of the public on the subject.

There are those who say that the American public is too quick to judge a thing by its appearance, and that this is especially true of new locomotives. I believe this to be true, and I think that it is also true of many other things in life. But I do not believe that this is the case in this instance. I believe that the American public is quite capable of judging a thing by its appearance, and that it is quite capable of forming its own opinions on the subject.

A NEW RECORD.

As long as there is a public, there will be a public opinion, and the public opinion will be formed by the people who make up the public. If the public is satisfied with a thing, it will be satisfied with it, and it will be satisfied with it because it is satisfied with it. If the public is not satisfied with a thing, it will be dissatisfied with it, and it will be dissatisfied with it because it is dissatisfied with it. This is the way the public opinion is formed, and this is the way it will be formed in this instance.

To the Editor—Mr. H. W. S. T. (E.),

I have been looking at your new locomotive, and I must say that I think it is a very good one. It is a very powerful engine, and it is a very fast one, and I think that it will be very successful in the hands of the people who will use it. I hope that you will have a great deal of success with it, and I hope that it will bring you a great deal of money.

Yours faithfully,
