MIND AND BODY CULTURE

DONALD BARTON  
Director Barton System

Dear Friend:--

Love came your way yesterday--you didn't recognize it.

Health held out its hand--you refused it.

Money beckoned to you--you didn't know that it was you that was being signalled.

Why?

Because you were not prepared for the good things of life. Your blood was not tingling and alive to the pleasures of this earth. Your mind was befogged with foolish notions, worthless superstitions.

You're missing the real joy of life, my dear pupil! All good things are yours for the taking. There is no lack. Won't you let me teach you how to realize this? Won't you let me prepare you--energize you--so the things you have always wanted will come your way without effort?

Did you understand the no-risk plan under which I offer my Barton System? Easy Terms if you want them--and a guaranty bond that you will be benefitted far more than you ever expected?

No matter who you are or what your position in life may be, you are either forging ahead or falling behind. Your success will never depend so much upon your natural ability as your determination to grasp your opportunity when it is presented to you. IT IS HERE--RIGHT NOW--TO-DAY.

NOW LISTEN CLOSELY--the secret of the success of my new course is that it builds up the mind and body BOTH AT THE SAME TIME. One is not neglected for the other--that is why it has produced so many efficient men and women.

You will have a new wondrous ambition, a freedom and mastery of yourself, a new and pleasing personality that will astonish all your friends and loved ones. It will give you a better and broader training of mind that leads straight to a big salary and a responsible position. It will not only show you how to THINK RIGHT, but will absolutely strengthen your heart, your lungs, your chest, your stomach, and every organ in your body. It will re-vitalize and re-energize you from head to foot.

(P. T. O.)

Your indigestion, biliousness, constipation, loss of appetite or dull, sluggish, tired feeling will soon be forgotten.

No man or woman living at the high pressure life of to-day can afford to let health take care of itself without suffering dangerous consequences. Modern conditions and environments are too much for us. They break down physical and mental efficiency. Not one in a thousand to-day is enjoying the health he or she could.

I wish I could have a talk with you for a few minutes. I know I could convince you of the wonderful opportunities my course holds for you. I know from long experience there are many men and women unconscious of their own ability, or, if they are aware of it, in most cases their ambitions are only half-awakened.

MAKE UP YOUR MIND RIGHT NOW, cast aside all obstacles, arguments, excuse or delays. Don't let anybody or anything hinder you from sending in the convenient "Special Application Blank" RIGHT NOW. You will never regret it.

Cordially yours,

*W. M. Barton,*

Director,

Barton Institute.
