FINAL OFFER ON THE SIMPLEY BELLS

You want muscle. You desire health. You wish for the things that muscle and health bring,

---but you can't get them by wishing for them. <u>Action</u> counts!

<u>Strength</u> is there! <u>Health</u> is there! Superb strength. Glorious health.

They are waiting for you. But you've got to <u>reach out</u> and take them.

They won't come to you.

Big muscles and perfect health--large sinewy arms, broad deep chest-can be obtained in one way alone--by working with nature according to her laws.

Cell life cannot be pushed beyond its power of recuparation without bad results--staleness, muscle-binding, variocele, hardening of the arteries, and so on. You know the signs. The cells that compose your body are small organisms that must have an opportunity to restore the energy that use in keeping you alive. They must not be overtaxed or forced,

--but with the Simplex Developing Dells, it is practically impossible to develop strain, overtax the muscular tissue, or devitalize the cells. Beginning lightly the task keeps steps with the cell growth. Prepared for the gradually increasing task the cell is stimulated to the point of highest efficiency. The muscles grow, expand, develop, and your body becomes stronger, more virile, more vigorous because you have followed the <u>law</u> of growth.

Not confined to the limits of bar-bell movements, the Simplex Eells develop every muscle of the body. No matter what system you may be using, the fascinating exercises with the Simplex Developers will improve that system.
